

# 5.8GHz ZERO LATENCY TRANSMISSION

LOW COST . HIGH QUALITY . EASY INSTALLATION . 1KM RANGE

The 5.8GHz system offers a low cost transmission solution for up to 1KM transmission range.

This unit is a simple 'plug and play' device which, literally, plugs into the camera, and receiver station, giving instant viewing of real time video and audio.

This analogue system delivers the exact same video and audio quality of cabled cameras up to the tested 1KM range. With 16 channels available to use, this system allows the transmission of video and audio from 16 cameras in one local area.

This system is totally **LICENSE FREE** in the UK.

We can build this system into an IP66 unit or supply it as a component. Please ask for a quotation from us at [sales@patex.co.uk](mailto:sales@patex.co.uk) or call us on ++44 (0) 1590 689240.

## Key Features:

Zero latency

16 Channels

25mW

License free

Transmission to 1KM

Video/Audio and switching channel

Video inversion

Power supply: 9-30V
