

Micro Transmitter & Booster

LOW COST . HIGH QUALITY . SMALL . LIGHTWEIGHT . NO LATENCY

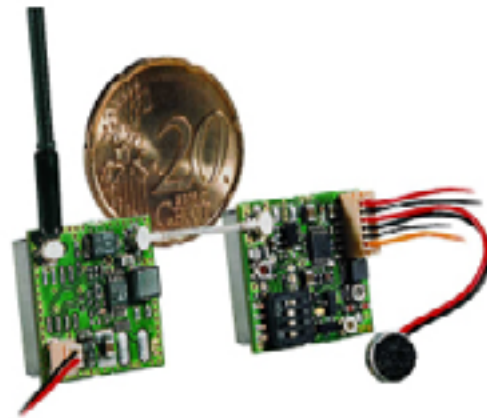

The Micro Transmitter offers a low cost transmission solution in a small and lightweight unit.

This unit comes in 1.4GHz, 2.4GHz and 5.8GHz frequencies which will cover all transmission requirements. It measures 18 x 18 x 13 mm and weighs 10g putting it at the smallest transmitter with the biggest output.

It comprises an audio input, transmission power of 10mW, up to 16 channels and a mains adaptor. The micro booster (pictured right with the transmitter) increases the transmission power to 200mW.

This analogue system delivers high quality video and audio but is small enough to be integrated into body worn/covert applications. This system is totally **LICENSE FREE** in the UK.
