

Mobile Control Centre

CUSTOMISED PORTABLE WIRELESS SYSTEMS

Mobile Control Centres are portable wireless systems integrated in hard cover cases. Each one is customised to the client specification.

They include all components for receiving video/audio and data. The cases are made from extreme robust material, can be pressurised and dustproof.

TFT monitor sizes range from 5.6" to 15" and are sunlight readable. Full PTZ control can be built in to the specification as well as diversity antenna system and integrated batteries to give a fully independent operation.

They can be used for both analogue and digital systems. They can house several receivers, internal and external antennae, digital recording and hard disk storage, exceptional video quality and USB interface.

Please contact us for further details and prices.

KEY FEATURES:

- Extremely robust plastic material**
- Completely customised**
- Built in multiple receivers**
- Full PTZ control**
- Different frequency**
- Power options up to 4W**
