

Mobile Mini Transmitter

WIRELESS VIDEO TRANSMISSION FOR MOBILE APPLICATIONS

This versatile wireless audio/video transmitter has been developed with mobility in mind with lockable connectors to protect against unintended disconnection.

It will transmit in stereo, has an internal channel selector, a connector for external antennae and comes with the option of cameras and a battery set.

This system comes in either 1.4GHz or 2.4GHz and up to 500mW transmission power. It comes with the additional features of entry level scrambling (change of video polarity) or switching channel.
